Subject Index of Volume 247

Adhesion
  TaC coatings prepared by hot filament chemical vapour deposition: characterization and properties, 34
Alloys
  composition dependence of the optical constants in amorphous Sb_xSe_{1-x} thin films, 94
  surface modification of ferritic stainless steel by laser alloying, 79
Aluminium
  recent advances in the application of collimated sputtering, 104
Aluminium oxide
  low temperature plasma anodic oxidation of silicon through thin aluminium overlayers, 178
Amorphous materials
  composition dependence of the optical constants in amorphous Sb_xSe_{1-x} thin films, 94
  optical and electrical properties of V_2O_5 thin films, 140
Anisotropy
  complex XRD microstructural studies of hard coatings applied to PVD-deposited TiN films. Part I. Problems and methods, 64
Annealing
  studies of $YBa_2Cu_3O_{7-x}$ formation in coevaporated Y–BaF_2–Cu–O thin films on sapphire substrates, 213
Anodic oxidation
  role of oxide ion concentration on the oxidation behaviour of zirconium in molten $NaNO_3$–KNO_3 eutectic, 56
Atomic force microscopy
  lattice constants and range of order of Cd arachidate Langmuir–Blodgett films determined by atomic force microscopy, 190

Band structure
  transport properties and band structure of non-stoichiometric $Cu_{2-x}Te$, 112

Cadmium sulphide
  improved CdS buffer/window layers for thin film solar cells, 3
Chemical vapour deposition
  low temperature metal–organic chemical vapor deposition of advanced barrier layers for the microelectronics industry, 85
  structure, morphology and resistivity of *in situ* phosphous doped polysilicon films, 156
  TaC coatings prepared by hot filament chemical vapour deposition: characterization and properties, 34
Chromium
  effect of oxygen and carbon on the formation and stability of A-15 crystal structure chromium thin films, 169
Coatings
  properties of radio-frequency magnetron sputtered ITO films without *in-situ* heating and post-deposition annealing, 201
Conductivity
  transport properties and band structure of non-stoichiometric $Cu_{2-x}Te$, 112
Contacts
  titanium disilicide on silicon by interdiffusion of titanium and amorphous silicon multilayers: transmission electron microscopy, spectroscopic ellipsometry and resistivity measurements, 44
Copper
  direct formation of CuTCNQ complex salts with dual deposition, 148
  modification of chemically deposited ZnSe thin films by ion exchange reaction with copper ions in solution, 208
Corrosion
  role of oxide ion concentration on the oxidation behaviour of zirconium in molten $NaNO_3$–KNO_3 eutectic, 56
Crystallization
  morphology of SnO_2 thin films obtained by the sol–gel technique, 162

Deposition process
  direct formation of CuTCNQ complex salts with dual deposition, 148
  morphology of SnO_2 thin films obtained by the sol–gel technique, 162
  new electrochemical method for selenization of stacked CuIn layers and preparation of $CuInSe_2$ by thermal annealing, 129
  properties of radio-frequency magnetron sputtered ITO films without *in-situ* heating and post-deposition annealing, 201
  recent advances in the application of collimated sputtering, 104
  titanium disilicide on silicon by interdiffusion of titanium and amorphous silicon multilayers: transmission electron microscopy, spectroscopic ellipsometry and resistivity measurements, 44

Electrical properties and measurements
  in situ detection of electrical conductivity variation of an a-WO_3 thin film during electrochemical reduction and oxidation in $LiClO_4$(M)–PC electrolyte, 51
  influence of discharge parameters on the layer properties of reactive magnetron sputtered ZnO:Al films, 15
  optical and electrical properties of V_2O_5 thin films, 140
Electrochemistry
  in situ detection of electrical conductivity variation of an a-WO_3 thin film during electrochemical reduction and oxidation in $LiClO_4$(M)–PC electrolyte, 51
  role of oxide ion concentration on the oxidation behaviour of zirconium in molten $NaNO_3$–KNO_3 eutectic, 56
Electron energy loss spectroscopy
  growth of GaSe layered compound on a GaAs(001) surface, 134
Electron microscopy
  titanium disilicide on silicon by interdiffusion of titanium and amorphous silicon multilayers: transmission electron microscopy, spectroscopic ellipsometry and resistivity measurements, 44
Electron devices
  low temperature metal–organic chemical vapor deposition of advanced barrier layers for the microelectronics industry, 85
Ellipsometry
  improvement of antibody surface density by orientation of reduced fragments, 244
  order–disorder transitions of yttrium arachidate Langmuir–Blodgett films via ellipsometric anisotropies, 120

titanium disilicide on silicon by interdiffusion of titanium and amorphous silicon multilayers: transmission electron microscopy, spectroscopic ellipsometry and resistivity measurements, 44
Evaporation
growth of GaSe layered compound on a GaAs(001) surface, 134
studies of $YBa_2Cu_3O_{7-x}$ formation in coevaporated Y–BaF_2–Cu–O thin films on sapphire substrates, 213
Fourier transform infrared spectroscopy
structural investigations of polyion complex Langmuir–Blodgett films containing fluorocarbon chains, 248

Gallium selenide
growth of GaSe layered compound on a GaAs(001) surface, 134
Gold
scanning tunneling topography and spectroscopy of gold particles sputtered on $BaTiO_3$, 98
Grain boundary
variation of trap density and barrier height with Cu/In ratio in $CuInSe_2$ films, 8

Hall effect
transport properties and band structure of non-stoichiometric $Cu_{2-x}Te$, 112
Hardness
TaC coatings prepared by hot filament chemical vapour deposition: characterization and properties, 34

Impurities
effect of oxygen and carbon on the formation and stability of A-15 crystal structure chromium thin films, 169
Indium
He/N_2 reactive gas composition and the structural and electrical properties of InN thin films grown on AlN-nucleated (00.1) sapphire by planar magnetron sputtering, 258
Infrared spectroscopy
structure of the modified surface layer formed by ion bombardment of SiO_2 films, 264
Interfaces
ionic effects on solid phase formation in 1-octadecanol films on levitated water drops, 184
low temperature plasma anodic oxidation of silicon through thin aluminium overlayers, 178
study of the conformationsl stability of cyclochrome *f* at the air–water interface, 240
Ion bombardment
structure of the modified surface layer formed by ion bombardment of SiO_2 films, 264
TaC coatings prepared by hot filament chemical vapour deposition: characterization and properties, 34
Iron
direct observation of silicide growth at Fe–Si interface during pulsed laser deposition, 39

Langmuir–Blodgett films
formation of H aggregates in a 7-aminocoumarin dye monolayer: a spectroscopy and elasticity study, 226
improvement of antibody surface density by orientation of reduced fragments, 244
lattice constants and range of order of Cd arachidate Langmuir–Blodgett films determined by atomic force microscopy, 190
light induced modifications of Langmuir–Blodgett multilayer assemblies containing amphotropic azocopolymers, 235
order–disorder transitions of yttrium arachidate Langmuir–Blodgett films via ellipsometric anisotropies, 120
structural investigations of polyion complex Langmuir–Blodgett films containing fluorocarbon chains, 248
X-ray diffuse scattering from lead stearate multilayers, 230
Laser ablation
direct observation of silicide growth at Fe–Si interface during pulsed laser deposition, 39
Lattice parameters
lattice constants and range of order of Cd arachidate Langmuir–Blodgett films determined by atomic force microscopy, 190
Luminescence
EXAFS studies of rare earth doped calcium sulphide thin films, 151

Metallization
recent advances in the application of collimated sputtering, 104
Monolayers
ionic effects on solid phase formation in 1-octadecanol films on levitated water drops, 184
second-harmonic generation from the monolayers of amphiphilic ferrocene derivatives, 1
study of the conformational stability of cyclochrome *f* at the air–water interface, 240
Multilayers
characterization of long-periodic layered structures by X-ray diffraction V: small angle X-ray scattering of distorted multilayers, 24
order–disorder transitions of yttrium arachidate Langmuir–Blodgett films via ellipsometric anisotropies, 120
X-ray diffuse scattering from lead stearate multilayers, 230

Nanostructures
improved CdS buffer/window layers for thin film solar cells, 3
Nitrides
He/N_2 reactive gas composition and the structural and electrical properties of InN thin films grown on AlN-nucleated (00.1) sapphire by planar magnetron sputtering, 258
Nucleation
ionic effects on solid phase formation in 1-octadecanol films on levitated water drops, 184

Optical properties
composition dependence of the optical constants in amorphous Sb_xSe_{1-x} thin films, 94
improved CdS buffer/window layers for thin film solar cells, 3
liquid crystalline films for fiber optic sensing of high hydrostatic pressure, 252
order–disorder transitions of yttrium arachidate Langmuir–Blodgett films via ellipsometric anisotropies, 120
second-harmonic generation from the monolayers of amphiphilic ferrocene derivatives, 1
variation of trap density and barrier height with Cu/In ratio in $CuInSe_2$ films, 8
Oxygen
influence of oxygen on the composition and some properties of the films obtained by r.f. sputtering from a Si_3N_4 target, 145

Phase transitions
effect of oxygen and carbon on the formation and stability of A-15 crystal structure chromium thin films, 169
formation of H aggregates in a 7-aminocoumarin dye monolayer: a spectroscopy and elasticity study, 226
ionic effects on solid phase formation in 1-octadecanol films on levitated water drops, 184
transport properties and band structure of non-stoichiometric $Cu_{2-x}Te$, 112
Photovoltage
electrochromic and photoelectrochemical behavior of thin WO_3 films prepared from quantized colloidal particles, 195
Polymers
liquid crystalline films for fiber optic sensing of high hydrostatic pressure, 252

Quantum effects
improved CdS buffer/window layers for thin film solar cells, 3

Reflection spectroscopy
formation of H aggregates in a 7-aminocoumarin dye monolayer: a spectroscopy and elasticity study, 226
Resistivity
structure, morphology and resistivity of *in situ* phosphorus doped polysilicon films, 156

Scanning tunneling microscopy
scanning tunneling topography and spectroscopy of gold particles sputtered on $BaTiO_3$, 98
Second harmonic generation
second-harmonic generation from the monolayers of amphiphilic ferrocene derivatives, 1
Selenides
modification of chemically deposited ZnSe thin films by ion exchange reaction with copper ions in solution, 208
new electrochemical method for selenization of stacked CuIn layers and preparation of $CuInSe_2$ by thermal annealing, 129
Semiconductors
electrochromic and photoelectrochemical behavior of thin WO_3 films prepared from quantized colloidal particles, 195
modification of chemically deposited ZnSe thin films by ion exchange reaction with copper ions in solution, 208
new electrochemical method for selenization of stacked CuIn layers and preparation of $CuInSe_2$ by thermal annealing, 129
optical and electrical properties of V_2O_5 thin films, 140
variation of trap state density and barrier height with Cu/In ratio in $CuInS_2$ films, 8
Sensors
improvement of antibody surface density by orientation of reduced fragments, 244
liquid crystalline films for fiber optic sensing of high hydrostatic pressure, 252
Silicides
direct observation of silicide growth at Fe–Si interface during pulsed laser deposition, 39
Silicon
low temperature plasma anodic oxidation of silicon through thin aluminium overlayers, 178
structure, morphology and resistivity of *in situ* phosphorus doped polysilicon films, 156
Silicon nitride
influence of oxygen on the composition and some properties of the films obtained by r.f. sputtering from a Si_3N_4 target, 145
Silicon oxide
low temperature plasma anodic oxidation of silicon through thin aluminium overlayers, 178
structure of the modified surface layer formed by ion bombardment of SiO_2 films, 264
Solar cells
electrochromic and photoelectrochemical behavior of thin WO_3 films prepared from quantized colloidal particles, 195
new electrochemical method for selenization of stacked CuIn layers and preparation of $CuInSe_2$ by thermal annealing, 129
Sputtering
effect of oxygen and carbon on the formation and stability of A-15 crystal structure chromium thin films, 169
He/N_2 reactive gas composition and the structural and electrical properties of InN thin films grown on AlN-nucleated (00.1) sapphire by planar magnetron sputtering, 258
influence of discharge parameters on the layer properties of reactive magnetron sputtered ZnO:Al films, 15
influence of oxygen on the composition and some properties of the films obtained by r.f. sputtering from a Si_3N_4 target, 145
properties of radio-frequency magnetron sputtered ITO films without *in-situ* heating and post-deposition annealing, 201
recent advances in the application of collimated sputtering, 104
scanning tunneling topography and spectroscopy of gold particles sputtered on $BaTiO_3$, 98
Steel
surface modification of ferritic stainless steel by laser alloying, 79
Structural properties
complex XRD microstructural studies of hard coatings applied to PVD-deposited TiN films. Part I. Problems and methods, 64
EXAFS studies of rare earth doped calcium sulphide thin films, 151
influence of discharge parameters on the layer properties of reactive magnetron sputtered ZnO:Al films, 15
light-induced modifications of Langmuir–Blodgett multilayer assemblies containing amphotropic azocopolymers, 235
low temperature metal–organic chemical vapor deposition of advanced barrier layers for the microelectronics industry, 85
morphology of SnO_2 thin films obtained by the sol–gel technique, 162
structure of the modified surface layer formed by ion bombardment of SiO_2 films, 264
Sulphides
EXAFS studies of rare earth doped calcium sulphide thin films, 151
Superconductivity
studies of $YBa_2Cu_3O_{7-x}$ formation in coevaporated $Y-BaF_2-Cu-O$ thin films on sapphire substrates, 213
Superlattices
characterization of long-periodic layered structures by X-ray diffraction V: small angle X-ray scattering of distorted multilayers, 24
Surface and interface states
formation of H aggregates in a 7-aminocoumarin dye monolayer: a spectroscopy and elasticity study, 226
lattice constants and range of order of Cd arachidate Langmuir–Blodgett films determined by atomic force microscopy, 190

Surface morphology
structure, morphology and resistivity of *in situ* phosphorus doped polysilicon films, 156
variation of trap density and barrier height with Cu/In ratio in $CuInSe_2$ films, 8
Surface potential
study of the conformational stability of cyclochrome *f* at the air–water interface, 240
Surface pressure
structural investigations of polyion complex Langmuir–Blodgett films containing fluorocarbon chains, 248
study of the conformational stability of cyclochrome *f* at the air–water interface, 240

Tin oxide
morphology of SnO_2 thin films obtained by the sol–gel technique, 162
Titanium nitride
complex XRD microstructural studies of hard coatings applied to PVD-deposited TiN films. Part I. Problems and methods, 64
low temperature metal–organic chemical vapor deposition of advanced barrier layers for the microelectronics industry, 85
Tungsten bronzes
in situ detection of electrical conductivity variation of an a-WO_3 thin film during electrochemical reduction and oxidation in $LiClO_4$(M)–PC electrolyte, 51
Tungsten oxide
electrochromic and photoelectrochemical behavior of thin WO_3 films prepared from quantized colloidal particles, 195
in situ detection of electrical conductivity variation of an a-WO_3 thin film during electrochemical reduction and oxidation in $LiClO_4$(M)–PC electrolyte, 51

Vanadium oxide
optical and electrical properties of V_2O_5 thin films, 140

X-ray absorption
EXAFS studies of rare earth doped calcium sulphide thin films, 151
X-ray diffraction
characterization of long-periodic layered structures by X-ray diffraction V: small angle X-ray scattering of distorted multilayers, 24
complex XRD microstructural studies of hard coatings applied to PVD-deposited TiN films. Part I. Problems and methods, 64
He/N_2 reactive gas composition and the structural and electrical properties of InN thin films grown on AlN-nucleated (00.1) sapphire by planar magnetron sputtering, 258
structural investigations of polyion complex Langmuir–Blodgett films containing fluorocarbon chains, 248
X-ray photoelectron spectroscopy
direct observation of silicide growth at Fe–Si interface during pulsed laser deposition, 39
growth of GaSe layered compound on a GaAs(001) surface, 134
X-ray scattering
characterization of long-periodic layered structures by X-ray diffraction V: small angle X-ray scattering of distorted multilayers, 24
light-induced modifications of Langmuir–Blodgett multilayer assemblies containing amphotropic azocopolymers, 235
X-ray diffuse scattering from lead stearate multilayers, 230

Zinc
modification of chemically deposited ZnSe thin films by ion exchange reaction with copper ions in solution, 208
Zinc oxide
influence of discharge parameters on the layer properties of reactive magnetron sputtered ZnO:Al films, 15
Zirconium
role of oxide ion concentration on the oxidation behaviour of zirconium in molten $NaNO_3$–KNO_3 eutectic, 56
